Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

The amendment received 31 May 2005 has been made of record. Claims 1-20 are pending.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Takagishi et al.

Takagishi et al disclose rubber compositions suitable for tire treads. These compositions are taught as comprising one or more elastomers, silica and carbon black filler and coupling agent.

The primary elastomer is taught as a copolymer comprising butadiene, acrylamides, hydroxyacrylates and vinyl aromatics in relative proportions such as claimed instantly. Each of the acrylic monomers is taught as present alone or in combination of two or more.

This primary elastomer is taught as having a Mooney viscosity of between 10 and 200.

A second diene based elastomer is taught as being present in relative amounts such as claimed instantly.

The use of a combination of silica and carbon black is disclosed and relative amounts such as claimed instantly are taught.

Triethoxysilylpropyl tetrasulfide is specifically taught as coupling agent.

The processes for compounding these rubber compositions disclosed by the reference at column 11, lines 39-52 are seen as meeting the limitations of the instant process since applicant's step 2 is recited as suitably carried out in the same step as step 1. Alternatively, since applicant's claims are directed to a product by process, applicants need demonstrate patentably distinct properties flowing from any differences in the process steps.

Therefore, the reference anticipates the rejected claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F from 10:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on 571 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
